## CUSTOMER QUOTES

"Just a note to let you know that your product Bio-Clean saved me the cost of a new leach bed and replacing my lawn" Wisconsin  
 "We have tried chemical cleaners in the past with some success, but have had almost unbelievable results with your product" Missouri  
 "I have used Bio-Clean for quite some time, and like it very much." Maine  
 "What I really like most is the way Bio-Clean cleaned up the "gook" in my kitchen sink drain and garbage disposal." Illinois

**SEPTIC OWNERS:** Nothing is more effective for biodegrading waste in septic systems than Bio-Clean. But no product can fix mechanical problems. We recommend Bio-Clean as part of a program of preventive maintenance which includes regular inspection of the tank, baffles, solids level and the proper use of water and drainage systems.

### Money-Back Warranty

Bio-Clean should be allowed sufficient time to perform and when used as per instructions is warranted to give customer satisfaction. All warranties are limited to the refund of the purchase price, by the dealer from whom it was purchased, upon presentation of the can with the unused portion of the product and proof of purchase.

**Clean Gene says, "Meet My Family"**

My relatives and I are friendly Bacteria. We are grown in incubators, dried and then mixed with enzymes and other helpers. When you mix Bio-Clean in water...

**SOLD EXCLUSIVELY BY THE PLUMBING AND PUMPING INDUSTRIES**

...we become active and hungry in about 30 minutes. Each of us eats his weight of waste in about one minute. Our family number can double every 30 minutes.

### Here's What We Do!

We feed, multiply and eat all through waste matter until it is eaten up. We change the waste into water, carbon and other elements which run harmlessly out of your waste system. These elements are then available food for plant life.

### We Work in ALL These Areas!

- Kitchen Sinks • Lavatories
- Bath Tubs • Showers
- Floor Drains • Laundry Drains
- Garbage Disposals • Septic Tanks & Fields

- R.V. & Boat Holding Tanks
- You can add us to cat litter

### Compare Us to Mechanical Equipment!

Cables can only poke a hole through the mess which leaves a base for new waste to adhere to. If you do not put my family to work, you will keep fighting the problem instead of solving it.

### Compare Us to Chemicals!

Hot, dangerous drain openers become more diluted and weaker the farther down a pipe they go. They cannot defy gravity, but we can! We eat our way up, down and across any pipe or system. After we clean your system, add us periodically and we'll keep it clean. We are Effective, Safe and Non-polluting!

### Clean Gene Says, "Do It Now"

Most people neglect their waste system.

When they need it most, it fails (Sundays, holidays, when entertaining guests, etc.). You may not know it but you need us right now! We are the greatest, BUT even my family needs time to clean up years of accumulated waste. Start using us now and continue using us periodically. We can, and will, keep your pipes and septic systems clean.

### We Can Renew an Entire System!

Chemicals, bleaches, detergents, food preservatives and bowl cleaners inhibit or kill bacterial action. This lets solids accumulate in the tank, some of which flow out and clog the drain field. We restore the necessary bacterial action and make your system work at full efficiency!
